

Cloud 9

998 CLOUD 9,
DREAM FLEECE, LOW LOFT

Pellon's Cloud 9 dream fleece low loft, 2.1oz is 100% polyester. We are using the highest quality micro fibers and a new state of the art needling process. The result is the finest polyester loft product in the market today and has the Pellon unconditional guarantee.

The silky hand and consistent even loft process result in an unsurpassed drape, giving even beginners professional heirloom quality results and products that are functionally breathable, warm and comfortable. This product is ideal for all of your crafting where a low loft is desired. It is perfect for quilting; the needling process resists or prevents bearding, prevents bunching and shifting, and allows the stitching needle, whether machine- or hand-, to glide smoothly through the fleece. Yet it is incredibly strong to allow close stitching (closer than 8"), for limitless design freedom.

Watch for our other new products that will offer midloft, high loft, as well as fusible versions coming soon to complete the cloud 9 product line.
