

## Contest Entry 2

Hi this is my entry for the contest. I have made a passport wallet. With my Viking D1 machine.

For this project I used 808 Craft Fuse & 987 Fusible Fleece. These are two perfect products for this wallet they add just the right texture. Makes the credit card slots cut out so nicely. They give the wallet a very nice feel and smooth appearance. Not too stiff also not flimsy. This wallet is great for travel holds your credit cards, passport, license. Great for travel. Using these products makes the embroidery very nice.
