

Fabric Valentine's Day Card

Hello!

Here is my entry for the Craft Corner Contest:

I love to use Pellon Peltex 72 for many projects, but my favorite use is for quilted postcards. I belong to a fabric postcard exchange, and the Peltex allows me to fully express my creativity while supporting my work appropriately. The double-sided fusible also makes these postcards go together in a flash! It needles beautifully without leaving a residue. Here is a picture of my latest creation.

Thanks!

Ebony Love
